Benedict / Emmett etc.		

Our Mission

The Highway Crew and vendors will perform ongoing hot patch repairs, catch basin structure repair, drainage and other roadway improvements throughout town, prioritizing need, budget and road program schedule. Focus areas will include needed repairs within the path of the road program and chip seal program. The Town is making every effort to coordinate with utility companies and State agencies to manage ongoing infrastructure projects and schedules. If budget and schedule conditions permit, the Town will address additional known issues and roadway improvements throughout the community to maximize the overall benefit to residents and the traveling public.
